## Summary

Designed and deployed cloud systems focused on reliability, monitoring, and infrastructure automation. Worked with AWS services, Linux environments, Git workflows, and Bash scripting to support deployments and maintain stable cloud environments. Strong interest in cloud engineering and scalable infrastructure systems.

## Experience

**Careerkick Services – IT & Automation Intern** Remote – Aug 2025 – Oct 2025

- Investigated platform issues and validated system stability for applications supporting **1,000+ users**.
- Automated operational tasks using scripting and cloud tools, reducing manual effort by **20–30%**.
- Assisted with deployment coordination and backend validations during platform updates.

**Ergon Enterprises – Data & Automation Intern** Remote – Jul 2024 – Sep 2024

- Automated reporting workflows using **Python scripts** across operational processes spanning **5+ project sites**.
- Reduced reporting preparation time by **25%** through structured data processing and workflow automation.
- Documented data flows and dependencies to improve operational reliability.

## Projects

**AWS Production-Ready Web Application – Cloud Infrastructure** Dec 2025 – Jan 2026

- Designed and deployed infrastructure across **2 Availability Zones** to ensure high availability and resilience.
- Provisioned AWS resources including **EC2, VPC, IAM, ALB, Auto Scaling, Security Groups** with CloudWatch monitoring.
- Simulated **3+ failure scenarios** and validated automated recovery through health checks and load balancing.

**Travel Planner Platform – APIs & Backend Support** Oct 2025 – Nov 2025

- Developed backend services supporting **3+ user workflows** including booking and onboarding.
- Implemented and tested **10+ REST APIs** with structured validation and SQL database integration.
- Diagnosed and resolved **15+ runtime issues** using log analysis and SQL query validation.

**Core Banking System & ATM Simulator – Backend Systems** Feb 2024 – Apr 2024

- Built a transactional backend system simulating ATM operations with strict data consistency requirements.
- Implemented **Java–MySQL architecture** handling authentication, balance updates, and transaction logging.
- Validated correctness through **100+ transaction scenarios** and optimized **15+ SQL queries**.

## Technical Skills

|                          |                                                              |
|--------------------------|--------------------------------------------------------------|
| Cloud Platforms:         | AWS (EC2, VPC, IAM, ALB, Auto Scaling, CloudWatch)           |
| DevOps & Containers:     | Git, CI/CD concepts, Docker (basic), Kubernetes (conceptual) |
| Automation & Scripting:  | Bash scripting, Python scripting                             |
| Networking:              | TCP/IP, DNS, Subnets, Security Groups, Load Balancing        |
| Programming & Databases: | Java, Python, SQL                                            |

## Achievements & Certifications

- **AWS Certified Cloud Practitioner** – Amazon Web Services (2026)
- **SQL for Data Science** – Coursera (2025)
- **Oracle AI Foundations Associate** – Oracle (2025)
- Led coordination of campus events with **3,000+ participants**.

## Education

**Vellore Institute of Technology** 2022 – 2026  
B.Tech in Computer Science Engineering, CGPA: 8.24/10
